# Tyler EAM, Munis Utility Billing, and Munis Revenues

This document provides an overview of the major Tyler® Enterprise Asset Management (EAM), Munis® Utility Billing, and Munis Revenues enhancements for the 2021.4 release.

For each major enhancement, the document provides the Jira number, a brief purpose statement, and the estimated PACE training time. It also indicates whether the enhancement is based on a client suggestion. PACE is the Tyler Planned Annual Continuing Education (PACE) program that supports your organization with ongoing education designed to provide your staff with up-to-date training on new features and functions. For more information on PACE for Munis, contact your account representative. When reviewing PACE details, please keep in mind that sessions are scheduled in four-hour increments.

For Munis 2021.4, there are no significant enhancements for Tyler EAM. See the 2021.4 release notes on <u>Tyler Deploy</u> for descriptions of the general enhancements that were completed for this module.

# **Munis Utility Billing**

## Account Event History, Lien Release Process

#### Jira Number: MUN-422760

**Purpose:** To provide a means of updating multiple lien release references at once. **Client Suggestion:** Yes

Estimated PACE Training Time: Less than 1/2 day.

**Description:** The toolbar in the Account Event History program includes the Update Lien Release Reference option, which updates multiple lien release references at once based on the lien release date.

\$	Acc	count	t Ever	nt Hi	istory	1																		٠	?	DO
X Close		Q Search	Browse		+ Add	Update	) Delete	Out		rint	<b>O</b> Display	POF	Save		Email	C Schedule		U Attach	Ŧ	Report Options	History	Misc Charge	Update Lien Rel Ref

New release reference				
Define processing	options			

In the Define step of the process, you can enter a new lien release date and lien release reference. The Process step searches for Transfer Delinquent to Tax (TDT) event records with a lien release date matching the defined date, and updates each record found with the defined lien release value. The program creates standard audit history for each record updated.

## Rate Codes, Calculate Charges, Bill Adjustments

### Jira Number: MUN-422441

**Purpose:** To provide a rate code for use in issuing sewer volume credits for accounts with multiple condominium units.

#### Client Suggestion: Yes

Estimated PACE Training Time: Less than ½ day.

**Description:** Calculation code 55 - Condo Unit Volume Credit is available for use in the Rate Codes program.

🐝 Rates

Effective date *	01/01/2021 Calc code * 55 ··· CONDO UNIT VOLUME CRE

This code is intended for use when the service type of the rate is O - Based On Other. It allows organizations to issue sewer volume credits for accounts with multiple condominium units when the total consumption for units falls under an allotment of three times the number of condominium units.

For rates that use this calc code, the UOM field is automatically populated with 3, and the UOM Allowance field is populated with 3 as the number of gallons per condominium unit.

Tyler Enterprise Asset Management, Munis Utility Billing, and Munis Revenues Major Enhancements 2021.4

Calculation processes in the Calculate Charges and Bill Adjustments programs are updated to multiply the number of condominium units by the allowed usage from the rate and then subtract the billed usage from the water service. For amounts greater than zero, the difference is divided by the unit of measure value from the rate. The results are rounded down to the nearest whole number and multiplied by the rate from the rate table.

# **Munis Revenues—Accounts Receivable**

## **Miscellaneous Receipts, Tyler Payments**

Jira Number: MUN-421931

**Purpose:** To integrate Munis Miscellaneous Receipts with Tyler Payment processing. **Estimated PACE Training Time:** Less than ½ day.

**Description:** When Tyler Payments is configured for your organization, you can collect and process miscellaneous receipt payments through Munis payment processing.

For the integration, the Use for External System checkbox in the Munis Charge Codes program must be selected for those charge codes associated with the payments.

In Tyler Payments, there must be a link between Munis Miscellaneous Receipts and Tyler Payments. On the Payment Integrations page in Portal Administration, selecting External

Systems provides the settings for defining this link.

Payments   Payment Int	tegrations		?	 МВ
← Portal administration	<ul> <li>Nexus - Munis Misc Payments</li> </ul>	Test connection		
Settings				
External systems	General settings			- 1
	Name *			_
	Nexus - Munis Misc Payments			_
	User ID			
	tylerpayments			
	Workstation ID			_
	tylerpayments			

Also in Portal Administration, selecting Search and Accounts Settings from the Tyler Payments sidebar options provides the Miscellaneous Payments option. Using the Add or Edit functions on this page, you can assign calculation methods, descriptions, and images for the payment type.

= 🐝 Payments   Sea	rch Administration	?	 MB

			Cancel	Sav	/e	

When payment settings have been configured, your Munis users can use the Tyler Enterprise Payments interface to pay for miscellaneous receipt items. Once the payments are submitted, the Munis Payment Entry program includes them in your organization's standard payment processes.

## **Process Lockbox File**

### Jira Number: MUN-421885

Purpose: To manage overpayments when multiple bills are processed.

Estimated PACE Training Time: Less than 1/2 day.

**Description**: The Overpayment Processing functionality in the Process Lockbox File program is expanded to include overpayment rejection functionality when multiple bill payments are processed.

If you have created a lockbox file for which the Overpayment Processing Method is set to Reject Payment but your lockbox file includes one or more payments that are greater than the unpaid amount due (including any penalties or interest), the program rejects the overpayments and creates an error report. When you view the error report, the rejected payments are identified.

### BATCH 00002031:ERROR REPORT

## **Payment Entry**

Jira Number: MUN-403160

**Purpose:** To provide a batch closure verification reminder when releasing batches. **Estimated PACE Training Time:** Less than  $\frac{1}{2}$  day.

**Description:** For payment batches collected outside of Munis (for example, payments collected using Tyler Cashiering) that are to be released in the Munis Payment Entry program, the program reminds you that the batches must be closed in the external system prior to being released in Munis.

When you access the batch in Payment Entry and click Output-Rel, the program presents a reminder that the batch was created outside of Munis and you should verify that the batch is closed in the external system. The reminder message is triggered for receipt batches that have either an external batch ID or an external batch number value.

🧇 Re	elease External Batch	×
1	This Batch was created by an External System. Releasing may prevent the External System from properly closing th	
-	Are you sure?	
	Yes No	15

Clicking Yes releases the batch while clicking No cancels the action.

# Roles

There are no permission or role changes in the Munis Roles programs for Tyler EAM, Munis Utility Billing, or Munis Revenues.
